Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The frame house is a two and one-half story frame structure constructed in a square shaped plan. It is built into a slope on a high fieldstone foundation with a full story on the main facade. The main facade has early-20th century stone work facing on the foundation level that includes corner plinths and side stairs. The square shape of the house and the hipped roof give it a Four-square style appearance although other features in the structure are late Victorian style. The structure is four-bays by four-bays and covered in German siding. It has two gable-roof dormers on the main facade. Windows have plain trim with a pointed-arch cornice. The structure appears to date from the late 19th century.

The property is located on the north side of Sandy Hook Road, approximately .03 mile west of Clark Road, in Sandy Hook. The structure sits close to the main road. The main facade faces south.

The two and one-half story structure is constructed of frame covered in German siding on a stone foundation. The main facade is asymmetrically arranged. It has a full-story at the foundation level with a single entrance. The foundation is covered in a random ashler pattern. This stonework also forms corner plinths near the front porch and a stairway on the east facade of the structure. The main story of the structure has an entrance in the second bay from the west. The third bay from the west has no opening and the outer bays have two-over-two sash windows. These windows have plain trim with a pointed-arch cornice. Similar trim along with a two-pane transom and round-arch upper panes are in the door. Two-over-two sash windows, several with round-arch upper panes are located in the four bays of the second story and in the bays on the sides of the house. The gable dormers have molded gables with six-over-one windows. The hipped roof is covered in sheet metal. An interior-end brick flue rises from the east side of the roof.

There are no significant outbuildings on the property.

## 8. Significance

Survey No. WA-III-095

Period	Areas of Significance—Check and justify below			
<input type="checkbox"/> prehistoric	<input type="checkbox"/> archeology-prehistoric	<input type="checkbox"/> community planning	<input type="checkbox"/> landscape architecture	<input type="checkbox"/> religion
